CONDUCT OF MATCHES

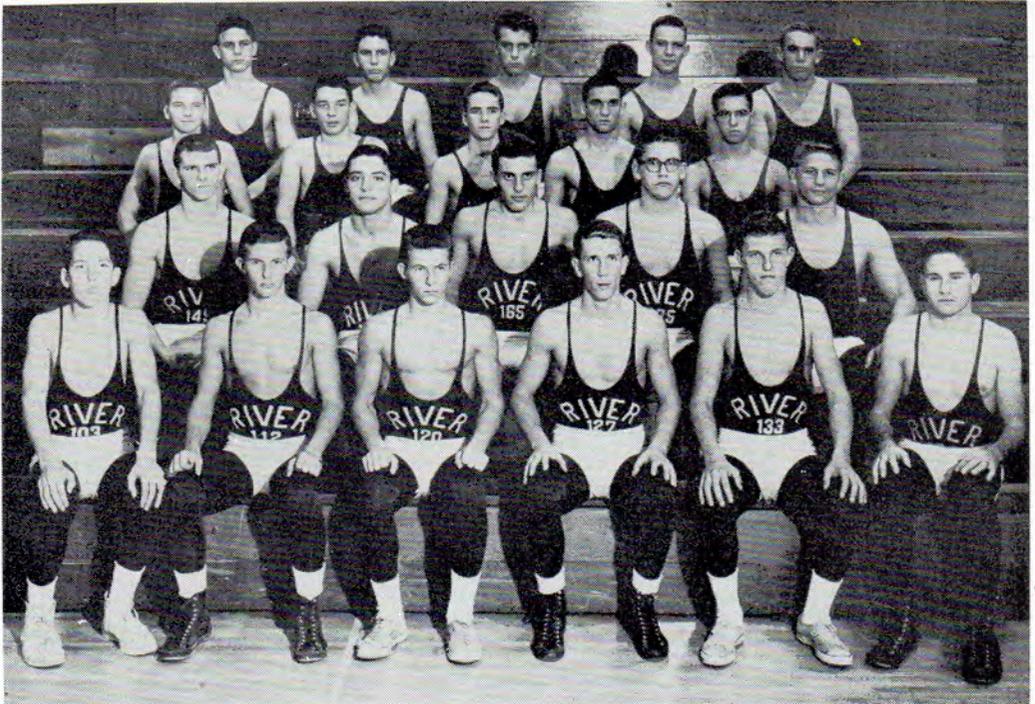

All regular matches consist of three two minute periods.

1. The first period starts with both contestants standing opposite each other on the circle. When the referee blows his whistle the contestants begin wrestling. A Fall (both shoulders on the mat for two seconds) during this or either subsequent period terminates the match. If there is no fall during the first period the match continues.
2. The second period starts with the Referee's Position. This position has one contestant down (disadvantage) and the other up (advantage). The position of the contestants is selected by the flip of the coin. If there is no fall the match continues.
3. The third period also starts with the Referee's Position but with the wrestlers in a position opposite to that taken at the start of the second period.

INDIVIDUAL MATCH SCORING

If no fall occurs during the match the Referee awards the match to the contestant who has scored the greater number of points as provided by the following point system:

TAKE-DOWN (from neutral to advantage)	
First take-down each man	2 pts.
Subsequent take-downs	1 pt.
ESCAPE (from disadvantage to neutral)	1 pt.
REVERSAL (from disadvantage to advantage)	2 pts.
NEAR-FALL (one shoulder down—the other within 1" for two seconds or both shoulders down for 1 second)	3 pts.
PREDICAMENT (one shoulder down—the other at 45 degree angle or both shoulders within 4" of mat for two seconds)	2 pts.
TIME ADVANTAGE (one wrestler in a position of advantage 60 seconds or more longer than his opponent. This is total time during all three periods)	1 pt.
